

# Upper Mt Gravatt State School

## Two storey general learning facility

Upper Mount Gravatt State School has an enrolment of approximately 500 students from prep to year 6. The original school opened in 1929. All of the current school buildings date from the 1940s.

-  Mt Gravatt, Queensland
-  \$6.4M
-  Sep 20 – Oct 21
-  Design and construction

### Project scope

Construction of a new learning facility including:

- Four Prep General Learning Areas (GLAs)
- Six General Learning Areas (GLAs)
- A staffroom
- Demolition and upgrades to student and staff amenities
- Upgrades to existing fire, electrical and security systems
- New playground facilities
- An open undercroft area design for future expansion
- A suspended walkway providing a seamless link between the old and new areas of the school.

### Business value to client

After the original building was devastated by fire, Wiley were contracted to build a brand new general learning facility and playground for Upper Mt Gravatt State School.

This future-focused project solution will enable Upper Mt Gravatt State School to increase their intake capacity, with the option of adding more General Learning Areas (GLAs) in the future.

Using our significant expertise in managing live education environments, Wiley delivered the project in a tight delivery timeframe over 40 weeks with minimal disruption to school operations.

### Partners and consultants

Hoffmann Civil | RJM Plumbing | ATSH Steel | Kleemann Elevators | Platinum Electrical | GCC Retaining Walls | Bluform Formwork | Professional Concrete Services | Brizmasonry and Airspect

“We were delighted to work collaboratively with the Queensland Department of Education, key stakeholders and subcontractors to safely deliver a great project outcome for Upper Mt Gravatt State School.”

Tom Wilson, Wiley Project Director
