

WILEY

Food Industry Capability

Since 1918.

Wiley is a trusted partner to food manufacturers, delivering integrated solutions across a diverse range of food sectors. In a fast-moving industry where product integrity, safety and efficiency are critical, we understand the complexity behind every process.

We work alongside leading producers to optimise operations across both brownfield upgrades and greenfield developments—integrating advanced processing, automation and infrastructure solutions that enhance performance and support long-term growth. With deep industry expertise, we help clients navigate regulatory requirements, adapt to changing market demands, and deliver high-quality, future-ready facilities.

INTEGRATED · DESIGN · ENGINEERING · CONSTRUCTION

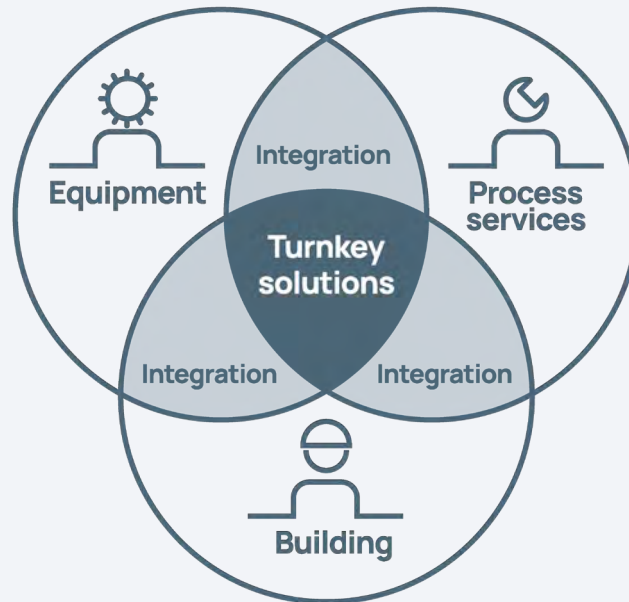

From concept to reality

Seamless integration of expert services.

Wiley is known for the seamless integration of design, engineering, and construction of specialised facilities for the food industry.

We navigate, develop and engineer the complex design of each unique project, elevating facilities and processes so the product, operation and workforce can thrive.

Our projects often take place in live environments where operational continuity and safety are paramount.

INTEGRATED SERVICES

Strategic planning

- Feasibility and options
- Master planning and staging
- Concept planning
- Site selection
- CAPEX Management

Pre-construction planning

- Strategic budgeting
- Value management
- Survey and scanning
- Early contractor involvement (ECI constructability review)
- Management of regulatory applications & approvals
- Cost planning
- Time scheduling

Building and industrial services

- Thermal services
- Hydraulic services
- Electrical
- Controls and automation
- Ventilation
- Odour control
- Compressed air
- Fire systems

Building design and construction

- Architectural, civil, structural, and services design
- BIM processes customised to your project
- Design management and detailed design development
- Construction documentation
- Procurement
- Supply chain management
- Digital project delivery
- Site management and supervision
- Safety management
- Principal Contractor
- Cost control
- Project delivery
- Quality control

Process solutions

- Basis of design
- Mass balance
- Piping and instrumentation diagrams, equipment recommendations, selection, and procurement
- Factory acceptance testing (FAT)

Commissioning management

- Wet and dry commissioning
- Training
- Acceptance testing
- Documentation and handover

Experts in food industry projects

Our people blend expertise, passion and agility with continuous learning, enabling us to innovate and integrate elegant solutions in an industry known for complexity.

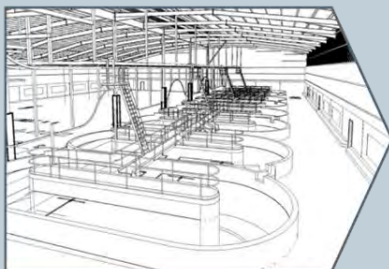

PROJECT EXPERIENCE

- ✓ Processing facilities (complex design and construction)
- ✓ Advanced automation to increase efficiency, productivity and safety
- ✓ Refurbishments, expansions and upgrades to optimise performance
- ✓ Building and service modifications for equipment changes
- ✓ Operational shutdowns and maintenance
- ✓ Complex infrastructure and services
- ✓ By-products and co-products
- ✓ Cold chain solutions and climate-controlled environments
- ✓ Storage and distribution facilities
- ✓ Sustainable energy solutions including biogas, bioenergy and solar power
- ✓ Covered Anaerobic Lagoons (CALs)
- ✓ Water and waste management systems
- ✓ High hygiene and laboratory environments
- ✓ Facility consolidation projects
- ✓ Associated retail and administration facilities including fitouts and commercial kitchens
- ✓ Compliance-driven projects

Coca-Cola Europacific Partners
Can Line Upgrades & New Process Infrastructure

Wiley delivered complex brownfield works at the Richlands facility, including a new can line, upgrades to an existing line, a recycling centre, and infrastructure relocation. Working in a live environment, the team managed demolition, services upgrades, and contamination control while maintaining strict hygiene and safety standards. Early Contractor Involvement refined designs to overcome logistical challenges, enabling early equipment installation and improved production capacity, efficiency, and sustainability. [\[Read more\]](#)

Graincorp Limited Edible Oils Refinery

Wiley partnered with GrainCorp to deliver complex brownfield upgrades to its edible oils facility, integrating site-wide services and process systems within a live environment. The project enhanced capacity, efficiency and yield while supporting the consolidation of operations into a centralised, high-performance facility. Delivered through a strong 'one team' approach, the upgrades improved safety, reduced logistics by over 550,000km per year and lowered carbon emissions—creating a more efficient, sustainable operation aligned with GrainCorp's long-term strategy. [\[Read more\]](#)

OneHarvest Pre-packed Salad Processing Facility

Wiley partnered with One Harvest to support its expansion into the New South Wales market, delivering advisory, site selection and master planning services for a new pre-packed salad facility. Leveraging a long-standing relationship and deep operational understanding, Wiley identified the optimal site to enable efficient distribution and future growth—strengthening market reach and positioning One Harvest to serve more customers across a rapidly expanding market. [\[Read more\]](#)

Primo Foods Cold Store and Distribution Centre

Wiley partnered with Primo Foods to master plan, design and construct a major cold store, distribution centre and production facility in Wacol, consolidating multiple operations into a single high-performance site. Delivered in stages, the facility integrates large-scale cold storage, processing and support infrastructure, enabling production of up to 1,800 tonnes per week. Designed with strict hygiene separation and advanced BIM coordination, the project ensured food safety, efficiency and on-time delivery—resulting in an award-winning, world-class facility. You're in good company

Since 1918, we've built lasting partnerships with some of Australia's most respected brands—trusted relationships founded on deep expertise, technical strength, and a shared commitment to long-term impact. Our clients rely on us to optimise operations, enhance efficiency, and deliver future-ready facilities in complex, high-performance environments. Many have stayed with us for years—some for decades—reflecting the measurable value we consistently deliver and the trust we've earned by helping them navigate change and embrace innovation.
